Section 1

To be completed by Area Trainer:

- Cast Member has completed Lockout/Tagout Generic training.
- Cast Member has been issued a personal Lockout/Tagout lock and tag.
- Cast Member has been instructed on the process and location for checking out LOTO tools (locks, tags, hasps, etc) when needed.
- Cast Member has been instructed on the shutdown and start-up procedures for each type of equipment they will be servicing and/or maintaining (additional OJT documentation may be required).
- Cast Member has been instructed on the specific isolation and control procedures for each type of equipment they will be servicing and/or maintaining (additional OJT documentation may be required).
- Cast Member has been instructed on the process for accessing written equipment specific LOTO procedures from D & E website.
- Cast Member understands their responsibility in relation to assisting other Lockout/Tagout Authorized Cast Members with isolation and control of energy sources for equipment in their location(s).

Area Trainer Signature: [REDACTED]

Date: 8/18/08

Section 2

To be completed by Trainee:

I acknowledge I have received and understand the information regarding Lockout/Tagout policies at the Walt Disney World Resort and within my Department. I also understand that I will be held accountable for adhering to these policies and procedures.

Cast Member Signature: [REDACTED]

Date: 8/18/08

Training Start Time: _____ Training End Time: _____

- Submit completed form to Coordinator responsible for SAP input.
- Record Business Event, WITH RESOURCES, into SAP Training & Events Management/Maintain Business Events (WDW_Lockout/Tagout Site Specific).

Instructor Personnel #	[REDACTED]
New Hire: <input checked="" type="checkbox"/> Transfer: <input type="checkbox"/>	

Section 1 – Generic Training

- I have attended the Confined Space Entry Online or Instructor Led Training offered by Regulatory Training.

Section 2 – Area Specific Discussion

As a result of my Confined Space Area Specific Training, I am now able to:

- Identify all Confined Spaces in my work area.
- Identify potential atmospheric and configuration hazards for each Confined Space.
- Identify and demonstrate the use of atmospheric monitoring devices used in my work area.
- Demonstrate Lockout/Tagout procedures and any other procedures to isolate space.
- Identify different types of personal protective equipment, including fall protection, which may be required and the proper location, use, care, and maintenance of this equipment.
- Locate and demonstrate use of area rescue equipment, i.e. tripod, winch, lifelines.
- Demonstrate emergency communication procedures to summon area assistance and Reedy Creek Emergency Services.
- Identify those area Cast Members who are designated as a Qualified Person Authorizing Entry.
- Locate the Material Safety Data Sheet (MSDS) binder.
- Review the WDW Confined Space Entry Permit.
- Review the WDW Confined Space Entry Written Program dated 5/2004. Special note to review section 5.

Cast Member Signature: [REDACTED] Date: 9/1/08

Walt Disney World Co.

Memorandum

To: Monorail Maintenance Personnel
From: Transportation Engineering Services Management Team
Subject: Guidelines for Obstruction Avoidance

Date: 10/15/02
Phone: 407-824-6343

Effective 10/16/02, Console operators shall be fully responsible for all damage incurred on a monorail entering or exiting the shop. In addition to current monorail bumping procedures, the following guidelines are to be followed:

- 1: The console operator shall walk both sides of the monorail beam to ensure all obstructions are behind the yellow clearance line and clear of monorail to be moved, including objects located on the exterior roof.

If personnel (i.e. painters) are present in the immediate area of the beam to be energized, the console operator may request a service manager or other appointed person to remain at the south end of the beam until the monorail has cleared the area. The service manager or other appointed person shall be responsible to ensure objects (inside or outside the bay doors) are not moved to a location that could interfere with the monorail's entrance or exit.

- I have discussed this procedure with my Service Manager, and understand it.

Memorandum

To: Monorail Maintenance Personnel

Date:

From: Transportation Engineering Services Management Team

Phone: 407-824-6343

Subject: Retrieval of Guest Items from Monorail Trough

All guest items that need to be retrieved shall be done by Monorail Maintenance cast members. The policy is to retrieve items after the monorail operation has been shut down for the day, however in the event of an emergency or other urgent matter, the guest item(s) can be retrieved during operation.

Any time Monorail Maintenance is dispatched to retrieve an item from a trough, the following procedures will be followed to ensure that the station 600-volt bus and adjacent buses are at zero state by de-energizing zone power:

1. Before leaving the Shop, check that your meter is functional by applying it to a DC power source. Upon arrival at the appropriate station, coordinate with Monorail Central and the Monorail Shop to de-energize zone power to the station. The Monorail cast member at the Shop will de-energize the appropriate line-ups to remove power from the zone.
2. The Monorail cast member at the station will press the E-STOP at the station console and apply a lock on the E-STOP. This will de-energize the station. Remove the key from the console power up switch and place both keys in your pocket or a secured location that only you can access.
3. Then verify the beam is de-energized by applying the same meter you checked earlier.
4. At Magic Kingdom, TTC or Epcot Center, use the stairs to the Maintenance platform and walk into the trough. At the Contemporary Resort, place a ladder in the trough and climb in to retrieve the item. (The ladder is stored at the station).

At the Polynesian Resort and The Grand Floridian Resort, the trough can only be accessed from the roof below the beam. Use an extension ladder to access the roof and retrieve the item. The work tractor and work cart can also be used to access the trough areas.

5. Give the item(s) to a Monorail Operations cast member.
6. When you are finished, check the area to ensure it is clear of personnel and equipment.
8. Remove the lock and reset E-STOP switch.
9. Replace and turn key in console power up switch.
10. Notify Shop and Monorail Central that you are clear and ready for power.

I have discussed this procedure with my Service Manager, and understand it.

Memorandum

To: Monorail Maintenance Personnel
From: Transportation Engineering Services Leadership Team
Subject: Maintenance Checks

Date: October 2, 2002

Phone: 407-824-4458

As of October 13, 2002, it will be no longer necessary to open the Monorail cab doors when performing a Maintenance Check. These changes will help us improve in the areas of Guest and Cast Safety, as well as adhering to OSHA Fall Protection Guidelines. While performing Maintenance Checks, it will now be necessary to engage the Monorail's E-Stop. The radio transmission (changes in bold) will be as follows:

Table with 2 columns: Role (Maintenance, Train, Central) and Radio Transmission Text. Includes instructions for Monorail (-----), E-Stop engagement, and disengagement procedures.

- I have discussed this procedure with my Service Manager and understand it.
